If you find any issues while using it, please comment your issue and i'll try my best to find the solution. Need's the newest Java to use! Please note that all the saves are supposed to be selected by their version! If your operating system is 32Bit use the 32 If your operating system is 64Bit use the 64 Character Customization works a treat! Money can be changed manually by your own number or the preselected buttons of +9999999, o, -9999999. I'm not responsible for the deletion of your save, Use at your own risk! Russian version of rules are now in the ReadMe file. Thank you for the support from my other sources at gtaall.com (Note: I'm not held responsible for the corruption of your save if that happens! I suggest you use a new, fresh save and then start on that one!) This is a work-in-progress as some of the scripts needed to change items on your save will corrupt your save! Use at your own risk! Update News! Fixed Script of money not saving Character Customization is now working Deleted 3 scripts to help resolve crash V4 dropping tomorrow! It'll have a whole new revision of the save editor, check it out ! I got the police outfit using this save game editor, and every time I get wasted I lose it and have to go to a safehouse to change my outfit back again. View All Comments | Add Comment Stepping Away From Modding!! want to say thank you to everyone who has downloaded this Save Editor! I have finished this project and layed it dormant for over 2 Years now with no follow up updates or changes and that goes for both projects I made... I want to say from everything I did, that you enjoy the editors I made and that you cherish them! I will not be coming back to modding!View All Updates Главная / Все файлы / Файлы для GTA: San Andreas / Программы / Savegame Editor 2.7 Нашли ошибку?
